Lantz Medical Announces the Acquisition of Kaiser Medical, Inc.

Company Also Confirms Closing of Previously Announced Acquisition of Applied Motion Technology, Inc.

INDIANAPLOIS, IN – Lantz Medical announced today that it has purchased the assets of Kaiser Medical, Inc, a privately held company based in Southampton, New Jersey. Lantz Medical, an orthopedic upper extremity rehabilitation company and a leader in the market for continuous passive motion devices of the hand, also confirmed the previously announced acquisition of Applied Motion Technology, Inc.

Lantz Medical was founded in 2005 with the goal of focusing on the product and technology needs of the upper extremity rehabilitation marketplace. With input from leading surgeons, therapists and patients Lantz Medical is developing a portfolio of innovative proprietary products for the use in upper extremity rehabilitation applications. During 2005 through 2007 Lantz Medical launched the first new innovation for continuous passive motion of the hand in 12 years and has already established itself as a leader in the market.

Ted Brown, CEO of Lantz Medical, commented, “We are very excited about our recent acquisition of Kaiser Medical, Inc’s assets. This acquisition, along with our recently closed acquisition of Applied Motion Technology, should leave no one guessing about our company’s resolve and commitment to innovation and market leadership in the under-served upper extremity marketplace.”

Bob Kaiser, President of Kaiser Medical, Inc. said, “Lantz Medical is positioning itself to be a national market leader in upper extremity rehabilitation products with a commitment to innovation. We look forward to Kaiser Medical’s opportunity to assist in this endeavor.”

About Lantz Medical: Lantz Medical is the national distributor of the Vector 1 and the Vector 2 hand rehabilitation systems. Lantz Medical also distributes a positioning device used for burn patients known as the Scaption Wedge Kit.
